REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

- The present invention is directed to a time code generator means for dividing a frame number indicated by time address data in supplied code word data by 2 so as to obtain a quotient and a remainder. Independent claims 1, 3 and 7 identifies the uniquely distinct features "means for replacing frame number indicated by time address data in code word data with a value of quotient and for generating a time code based on the code word data in which a value of a color frame flag is set to 0 if a value of remainder is 0, and for replacing frame number indicated by time address data in code word data with value of quotient and for generating a time code based on the code word data in which value of color frame flag is set to 1 if value of remainder is 1".
- A time code reader means for multiplying a frame number indicated by time address data in time code by 2 to obtain a product. Independent claims 5 and 6 identifies the uniquely distinct features "means for replacing frame number indicated by time address data in time code with a value obtained by adding 1 to product if a value of a color frame flag in time code is 1, and for replacing frame number indicated by time address data in time code with value of product if value of color frame flag in time code is 0".

The closest prior art, Morimoto et al. (US 6,526,216), Yoshida et al. (US 2003/0210892) and Sakai (US 6,694,088) either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
